EXPERIENCE

Independent Web Developer

The Odin Project

2023 - Present, Barrie, Ontario

- Created extensive technical documentation on personal programming projects.
- Communicated with a community to solve technical problems during app/site development.
- Helped mentor and support new developers in the Odin Project community.
- Developed and deployed 20+ full-stack applications using React.js, improving feature scalability and performance.
- Debugged and enhanced portfolio projects, designing and implementing npm/jest unit tests to improve functionality and user experience.
- Exercised critical thinking and problem solving to learn and implement new concepts regularly.

Residence Don

Brock University

2021 - 2022, St. Catharines, Ontario

- Gave a talk about community standards in person, and on Zoom.
- Managed a community of residence students, striving to create a safe and inclusive environment.
- Promoted community engagement by planning and hosting remote group events.
- Presented information at group events, communicating and engaging with students.
- Provided mentorship and mental health support to community members.

PROJECTS

eCommerce Storefront

React.js | HTML5 | CSS | Javascript

- Developed an e-commerce site with React, implementing product searching and filtering features.
- Designed a shopping cart system, improving transaction flow and significantly enhancing user experience.

Social Media Dashboard

React.js | Express.js | Node.js

- Built a social media dashboard with JavaScript Node.js APIs, featuring user profiles and analytics.
- Designed a responsive front-end with React.js, CSS, and JavaScript for seamless cross-device usability.

Blog Content Management System

Javascript | EJS | Express.js

- Created a CMS with Node.js and Express.js, supporting user roles, post creation, and secure user login.
- Designed client-side routing functionality, improving content organization and enhancing user navigation.
